

Using XFP

by Flavio Tordini

1. Running the server

The XFP server can be started and stopped by running the batch scripts in `$XFP_HOME/bin`. if the XML configuration file is not specified the default (located at `$XFP_HOME/conf/engine.xml`) will be used.

Linux:

```
./xfp.sh start [xmlfile]  
./xfp.sh stop
```

Windows:

```
xfp start [xmlfile]
```
